Profile

Highly motivated and experienced software developer with a strong background in both backend and full-stack development. Currently working as a Lead Backend Developer, I have a proven track record of successfully managing complex projects and delivering high-quality software solutions. My expertise spans across various technologies, including Node.js, Go, TypeScript, JavaScript, NestJS, Express.js, React.js, Next.js, PHP, TensorFlow, AI, and ML. With a solid foundation in DevOps practices, I excel in creating robust, scalable, and efficient systems. My passion lies in backend development, but I also possess extensive experience in front-end development, allowing me to contribute effectively to all phases of the software development lifecycle.

Professional Experience

Lead Backend developer, KTS (kegeberew technology solution) ☑

2023 Jul – present

Am currently working as a backend developer

Adis Abeba, Ethiopia

Full-stack developer, 3S Betting

2023 Jun

am currently working as a full-stack developer at 3S betting remotely.

reotly, Ethiopia

freelancer, self employd

am working as a freelancer for both local and international businesses. I specialize in creating robust, scalable applications and systems, ensuring compliance with industry standards.

Projects

KCCM, kegeberew consiumer credits managment ☑

Full-Stack Developer (Backend Focus)

I worked on this project in KTS. I contributed as a full-stack developer, primarily handling the entire backend development for this project. The deployed system integrates with the Kegeberew eCommerce platform and is actively used by numerous cafes, restaurants, hotels, and catering services in Addis Ababa. It efficiently processes thousands of orders, manages credits, and handles order tracking.

kegeberew university, Kegeberew University LMS Project (KTS) ☑

Participated as a backend developer in the Learning Management System (LMS) project at Kegeberew University. This project involved creating a basic LMS with integrated tutoring capabilities, allowing different course providers to offer and manage their own LMS systems.

3S Betting Ticket Management Project ☑

Serving as a full stack developer for 3S Betting, I have independently developed a comprehensive betting ticket management system. This project empowers 3S Betting to efficiently manage their business processes, conduct detailed analytics and reporting, record betting ticket outcomes, track wins and losses, process payments, and track results for various games.

stop mde 

Participated as a backend developer in this project

Skills

- JavaScript
- MongoDB
- React.js
- Problem-solving
- troubleshoot and resolve technical issu
- Postgres
- Docker
- node.js
- PHP
- Communication
- Attention to detail
- TypeScript
- Go

Certificates

- Server-side Development with NodeJS, Express and MongoDB 
- Front-End Web Development with React 

Education

Computer Science, Debre Tabor University

MGPA: 3.5

CGPA: 3.19

2019 Nov – 2023 Jun

Debre Tabor, Ethiopia
